

FOLDERS

The MTF-1 and MTF-2 represent 18 years of honing skills in the tactical knife industry. The liners are made of heat-treated stainless steel which produces a very rigid frame and locking bar. The blade is extra thick to give the user additional tip strength; at the same time the grind lines are high enough to produce a razor sharp blade edge. While the MTF-1 was designed with soldiers in mind, the MTF-2 is an excellent self-defense tool.

SPECS:

MTF-1 & MTF-2

Weight: 5.50 ounces

Blade Length: 4.00 inches

Blade Style: (MTF-1) Drop Point;

(MTF-2) Modern Tanto Reverse Curve

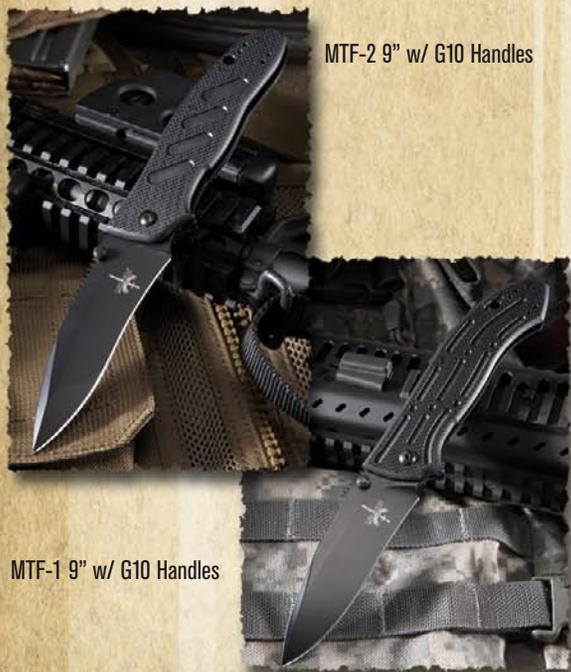

Blade Finish: Ceramic or Teflon coated blade

Blade Steel: Stainless Steel

MIL-TAC[®] Knives and Tools

MIL-TAC Knives and Tools believes in serving those who defend us on a daily basis. This motto can be found in every single model of knife or tool that we manufacturer. It begins and ends with our companies four major goals: design, components, manufacturing, and customer support.

◆ **Design** – MIL-TAC Knives and Tools partners with the industry leading designers and continually takes feedback from our customers in order to continually improve our products

◆ **Components** – MIL-TAC Knives and Tools only selects the highest quality components from rock solid suppliers so that our products exhibit excellence in construction in order to meet and exceed our customer's high expectations.

◆ **Manufacturing** – MIL-TAC Knives and Tools uses the finest manufacturing processes and procedures to ensure that the final product is both rugged and reliable. Your life may some day depend on our products and we take that very seriously as we take pride in creating the finest quality products.

◆ **Customer Support** – MIL-TAC Knives and Tools strives to provide the best customer support in the industry. From the initial recommendations of a product through the lifetime warranty work, the customer's satisfaction is our only true objective and that satisfaction is guaranteed.

TACTICAL DEFENSE PENS

This pen was designed with the military and law enforcement communities in mind. One end is pointed, which could be used as a very effective self-defense tool while the other end is blunt and could be used as a control device. The aircraft grade aluminum body with type 3 anodizing give this pen a very tough and reliable construction. Not only is this pen designed to be used as a defense tool and writing instrument but it also has a very attractive appearance and can also be used as a PDA stylus or pen.

SPECS:

Length: 5.25" long

Weight: 1.2 ounces

Pen Finish: Type 3 anodization, multiple colors available

Pen Thickness: 0.450 inches

Blade Material: Aircraft grade aluminum

Pocket Clip: Stainless Steel

Fittings: Stainless Steel

Ink Colors: Black or Blue

Tactical Defense Pen (TDP-1)

GRIPS

The MIL-TAC 1911 grips are machined from G10 laminate which is the best choice for rugged tactical pistols that require an extreme duty grip. Impervious to solvents, heat, sweat, salt water or moisture, these grips offer non-degrading dimensional stability under all conditions and will not crack or chip especially around the grip screw holes.

SPECS:

G10 laminate Government grips are available in solid black and also a black and grey laminate. Both colors blend well on a blued or black pistol as well as a stainless steel or two tone (blued and stainless steel) pistol and fits all 1911 Govt. grip frames. Additional Tactical models are available in black and black & gray laminate for pistols like the Springfield TRP that have a magazine well extension. These will soon be available in Desert Tan, Flat Earth Brown, OD Green and other laminates.

1911 GB G10 Grips

FIXED BLADES

The CS-1 was designed from feedback from many military and law enforcement units and their desires for a fixed bladed knife that is extremely tough yet comfortable to use for long periods of time.

The CE-1 was designed to be heavy-duty fighting knife for use by the soldier in the field, the undercover operative or the law enforcement officer who might need a last-ditch weapon. While not possessing the double-edge of the CE-1, the CE-2 is an outstanding choice for many general field duties.

SPECS:

CS-1

Weight: 9.4 – 11.1 ounces

Blade Length: 6.50 inches, 5.50 inches, and 4.50 inches

Blade Finish: Satin
